

Abdul Rehman

Frontend Web Developer

Self-taught React.js enthusiast with hands-on experience building and deploying responsive web demos. Passionate about clean, modular code, user-centered design, and continuous learning. Seeking a React.js intern/junior role to apply my React, JavaScript (ES6+), and CSS skills in a collaborative environment.

WORKING EXPERIENCE

Independent Frontend Projects (Self-Directed) Lahore

- Built and published 5+ demos: A Food Delivery App, Tic-Tac-Toe game, a Hotel Management System.
- Integrated Tailwind utility classes to deliver responsive UIs; implement Redux Toolkit for state management where appropriate.
- Deployed to Netlify/Vercel; maintained version control via GitHub.

School Management System

- Built a full-stack School Management System using React.js, Node.js, Supabase, and Redux Toolkit with secure authentication, role-based access control, and separate Admin and Student dashboards.
- Developed complete CRUD functionality for student records, attendance, fees, subjects, and assignments with real-time synchronization using Supabase.
- Implemented personalized student dashboards displaying attendance history, fee status, assignments, and academic information while utilizing Redux Toolkit for efficient state management.

Portfolio Website

- Developed a responsive personal portfolio using **React.js** and **Tailwind CSS** to showcase projects, technical skills, and contact information with a modern, user-friendly interface.

Food Delivery App

- Built a responsive food ordering application using **React.js** and **Tailwind CSS**, featuring dynamic product listings, shopping cart functionality, and an intuitive user experience.

Tic Tac Toe Game

- Developed an interactive two-player Tic Tac Toe game using **React.js**, **CSS**, and **React Context API** for efficient state management, delivering a responsive and engaging gameplay experience.

Prescripto – Doctor's Portal (Frontend)

- Designed and developed the frontend of a doctor appointment management system using **React.js** and **React Context API**, enabling appointment scheduling, patient management, and prescription workflows through a responsive UI.

Hotel Management System

- Developed a hotel management platform using **HTML5**, **CSS3**, **Bootstrap 5**, and **JavaScript**. Implemented features for booking management, guest records, cashier details, and secure authentication for hotel staff.
